Upgrade to LED?

Make your ADB dimmers UP2DATE and ready for the future!

Is your venue switching from incandescent to LED? Then you need real fixed power. But you also want to be able to dim.
Pino Solutions has developed a safe direct 230 volt EASY SWITCH for your ADB dimmers. With EASY SWITCH your dimmers can continue to operate for many years and comply with today's needs.

Every circuit equipped with a safe direct 230 Volt via relay for your moving lights, LED pars, boosters, smoke machines, Artnet nodes, sound amplifiers, active speakers and single phase motors.

- Upgrade to EASY SWITCH: DIM/230Volt on all circuits
- No DMX needed! 100 % stand-alone system
- Colour touch display for easy, quick access, available in 3 sizes
- Built-in or remote
- Available for ADB EURORACK. Expandable to max.10 Euroracks.
- Available for ADB MEMORACK 180. Up to max. 240 dimmers per control
- For all types of dimmers 380/220 regardless of software version
- Options: pre-programmed settings for fixed positions, control via RDM, IOS and OSC
- Exclusively installed by Roadtech Services
